

RV Eye

App User Guide

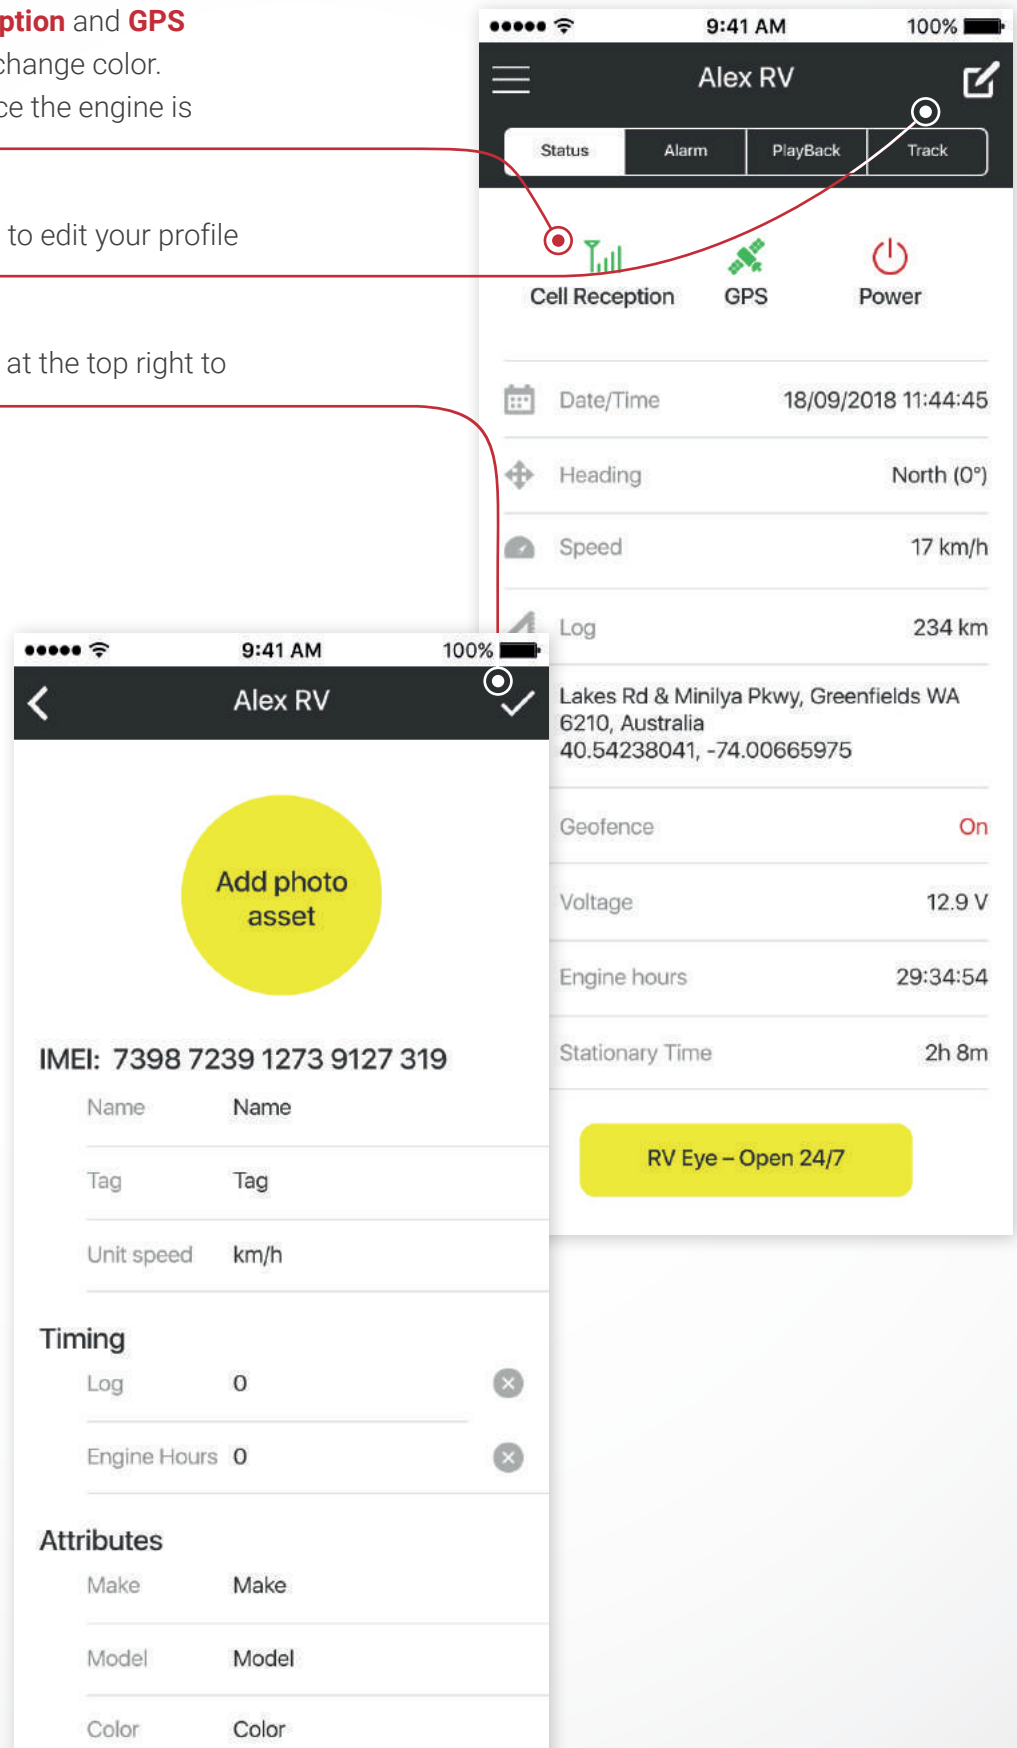

— RV Eye App User Guide —

— The Status Page —

You should have green **Cell Reception** and **GPS connection**. If not, the icons will change color. The ignition will turn to **Green** once the engine is running. 

Click the **Edit** icon at the top right to edit your profile and add a photo of your rv. 

Don't forget to click the **Tick icon** at the top right to save all your changes. 

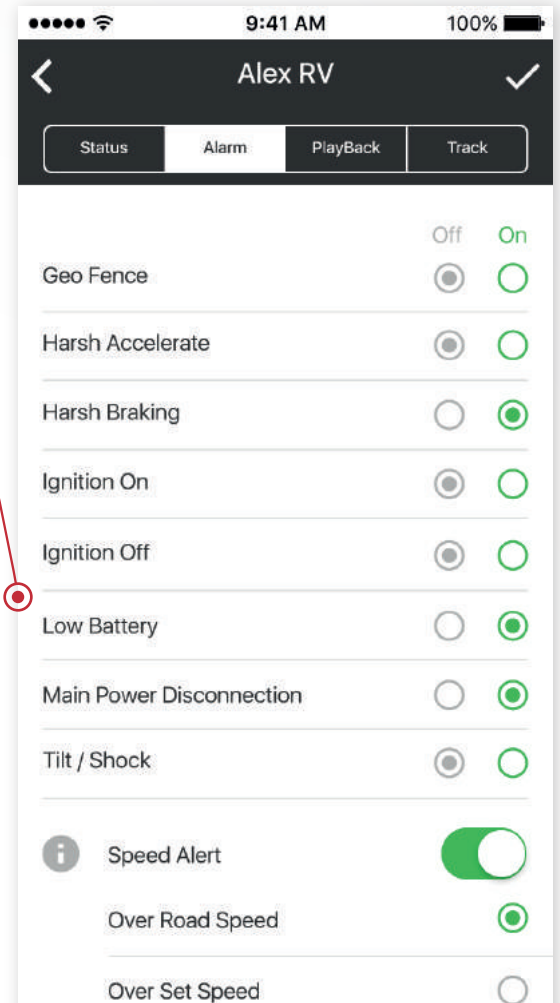

— The Alarm Page —

Select the alarms that you want to go live and that apply to your rv. 

Don't forget to click the **Tick icon** at the top right to save all your changes.

All alarms are sent to the RV Eye 24/7 Control Center and simultaneously to your phone.

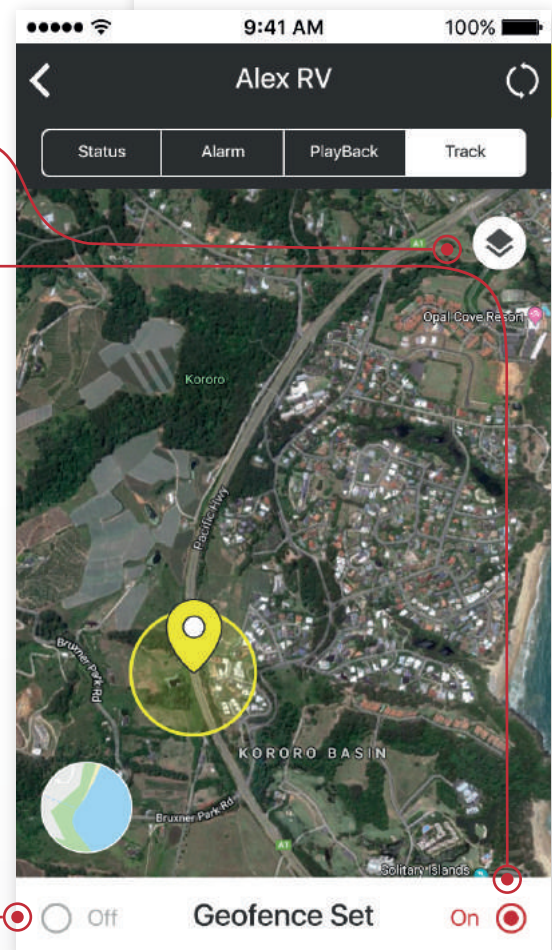

— The Track Page —

Tap the **three layered squares** icon at the top right for different viewing options. Satellite view is set as a default. 

To set the Geo Fence, simply tap the **"On" button** at the bottom of the page. 

You will see the Geo Fence set in a red shaded circle. The Geo Fence radius is set at 100 yards around the location of your rv.

To turn of the Geo Fence, tap the Geo Fence Set **"Off" button**. 

— The Playback Page —

Select the date and time range that you want to playback the recording of your GPS tracking. 

It is set as the last 24 hours as a default, but you can search back.

The date range cannot exceed 7 days at a time.

Don't forget to click the **Tick icon** at the top right to save all your changes.

Click the **Play icon** at the top right to start playback. Click again to pause – and again to restart. 

Tap the **location** at anytime along the route [when paused] for full tracking details.

The speed of the playback recording can be adjusted by the **Slow – Fast red button** at the bottom of the page. 

The playback can also be done manually by sliding the **Start – Finish red button** at the bottom of the page. 

Tap the **three layered squares icon** at the top right for different viewing options. Satellite view is set as a default.
